

**2006 SNYDER'S MODEL 1866 JD-CC BOAT
AND MODEL 2266BT TRAILER**

On January 27, 2006 the Dauntless Hook and Ladder Fire Company took delivery of a new water rescue boat and trailer. The aluminum jet boat hull is a custom made model 1866 JD-CC fabricated by Snyder's Welding and Air Boats of Millersburg, PA at a cost \$7500.00. It is 18' 4" long, has an 82" beam, a 9" draft and a 16" freeboard. It can run on plane in 2" of water. The boat is powered by a \$7400.00 Mercury 80 horsepower outboard jet motor, which can be lifted out of the water by a hydro-jack motor mount and is capable of handling a 150 horsepower motor. It has a maximum weight capacity of 1500 pounds including persons and equipment with a maximum capacity of 6 persons totaling 1050 pounds. The boat is equipped with high band and low band radios, an Eagle depth finder, emergency light and all other boating equipment as required by the Pennsylvania Fish and Boat Commission. The boat also carries an assortment of equipment for use in water rescue whether it is river, creek or floodwaters. The 2006 model 2266BT trailer was also custom built by Snyder's at a cost of \$1500.00. It weighs 990lbs and has a GVW of 2990lbs.
