

CHEVROLET EQUIPMENT TRUCK

The Utility is the second vehicle from the left

Based on the minutes from the Junior Firefighters, discussions on purchasing an equipment truck to transport the Juniors to calls began on April 1, 1963 and continued until at least August 31, 1964. Discussions on housing, equipping and lettering the truck began on October 7, 1964 and continued as late as December 6, 1966. No actual date of being placed in service has been found. It is assumed that the Equipment Truck was taken out of service when the 1976 Utility Van was placed in service in March of 1980 and the Junior's minutes from February 18, 1980 tend to verify that by stating, "there will be no standing on the new truck". The Equipment Truck served as a personnel transport as well as carrying accessories associated with fire suppression.
